

Population for Storm Water Entities as Defined by the 2000 Census

Rhode Island

This document contains calculations for populations within an Urbanized Areas (UA) as designated by the US Census Bureau for the state of Rhode Island. Population is calculated for each portion of either an incorporated place, minor civil division, or a county within an UA and is based on the population values provided by the 2000 US Census Tiger data. In addition, a table is included that provides a list of places that have a population greater than 10,000 people and a population density of 1,000 people per square mile that are not located in an UA. This data was obtained from the US Census website.

Urbanized Area Populations

It should be noted that the Incorporated Places and the Minor Civil Divisions tables should not be used together. The tables cover the same areas divided into two different political entities. If the tables are used together it is possible that double counting of populations will occur.

Incorporated Places Table

The table below provides a guide for the UA table headings.

Outside Urbanized Area Populations

As mentioned above, the places in the following table all have a population greater than 10,000 people and a population density of 1,000 people per square mile.

Place and County	Population 2000	Population Density (per sq. mile)
Westerly CDP, Washington County	17,682	1,107.00

Population density and 2000 information was obtained from the U.S. Census website (<http://www.census.gov/main/www/cen2000.html>).
